Banks and Mirrors!

The Director of the Bank of England, Sir Josiah Stamp, said in AD1927, ‘The modern banking system manufactures money out of nothing. The process is perhaps the most astonishing piece of sleight of hand that was ever invented... but if you want to continue to be the slaves of the bankers and pay the cost of your own slavery, then let bankers continue to create money and control credit.’

Our banks operate as pawn shops, possessing a license to create bank credit. During the creation of bank loans, customer collateral is placed before a financial ‘mirror’, a bookkeeping device which allows the banks to value the assets. The bank then transfers the ownership of the collateral to the bank, and the reflection is recorded as 'bank capital', now owned by the bank. Astonishingly, the act of loaning has created the capital for the loan! A $1 loan, at 6% annual compound interest, calculated daily, over 550 years, creates a customer debt of 214 trillion dollars, all accrued upon a reflection of the customer's own $1 asset! Has a more insane monetary system ever darkened the face of our earth? Welcome to Debt Banking, cartel fraud, and Satanism!

However, in Asset Banking, the reflection of customer collateral is deemed to be an interest-free asset, owned by the customer, with the title to the collateral held in trust, until the loan is repaid. A $1 loan, at 0% annual compound interest, calculated daily, over 550 years, creates a debt of only $1!

Perhaps it is time then for a public inquiry into our nation’s banking system, as we may have foolishly exchanged the iron chains of the slave, for the financialised chains of debt!
Asset Hydro Monetary Systems!

Asset Banking systems are already used by the hunter-gatherers, the other two million species upon our planet, and the natural systems of our cosmos. Have you ever seen ant colonies collapsing through debt?

In Asset Banking, we can define money as ‘human life-force, exchanged within a marketplace’, so money is simply, ‘I will go to the sea for a fish, if you go to the hills for fruits, and tonight we will feast’! The definition for money becomes, ‘the distance that a typical human being, walking at the normal speed of five kilometres per hour, will cover in one hour, that is 5000 metres’. This is a measure of the human psyche, human biology, time, distance, and the speed of light, as a metre is a measure of the speed of light within a vacuum.

Our national treasures can now be monetised as an asset-lake, appearing within the sovereign heart of our nation, a lake which can flow through the turbine of monetary policy, to power our economy, in the same way as hydro-lakes generate electricity. The nation’s monetary potential has become a lake of capital, the creation of the monetary supply has been democratised, the people have become their own central banks, and we can now micro-manage the monetary supply for each local community!

This financial lake allows us to escape the historical prisons of debt peonage, and the crime scene known as the ‘price of money’. Asset monetary systems then are highly efficient ways of running a national economy, just as an electric light globe is millions of times more efficient than a medieval whale oil lamp. In our $1 loan example, an Asset Hydro system is 214 trillion times more efficient than a debt system! Welcome to the financial incandescence known as Asset Hydro, a monetary system free from the four financial demons, those of debt, interest, taxation, and inflation!
