

Bank Crimes!

Robert B. Anderson, Treasury Secretary under Eisenhower, 1959.

'When a bank makes a loan, it simply adds to the borrower's deposit account in the bank by the amount of the loan. The money is not taken from anyone else's deposits; it was not previously paid in to the bank by anyone.

It's new money, created by the bank for the use of the borrower'.

This historical quote answers a bewildering financial question, 'who supplies the capital for our loans, when the world is drowning in debt'? This question is based upon a banking illusion, deliberately created by the banking industry. Banks do not loan bank capital, banks loan bank credit, created by monetising their customer's assets, using a banking 'mirror' called double entry bookkeeping. To create this banking deception, the banks require their customers to bring their assets to the bank, assets which become collateral for their loans. This collateral can now be placed before the bank's financial 'mirror', with the reflection recorded as 'bank capital', owned by the bank. Through this deceptive technique, the banks convert the treasures of the world, into debts owed to the bankers!

This reflected 'bank capital' can now be deposited into the customer's account, within the form of a loan, bearing compound interest, with the banks misleading their customers into believing that the banks are loaning pre-existing capital, a belief which forces the bank's customers to accept the burdens arising from compound interest. At the end of each banking day, the banks gather together and compare their transactions, balancing their books with further interbank loans. The monetary supply has now appeared from nothing, within the form of debts, bearing compound interest, all owed to the bankers, and the world has been stolen by a reflection within a mirror! This deception is a crime, created against the laws for fiduciary duty, the laws which prevent financial officers from defrauding their customers!

We can see, during this creation of bank loans, that the bank only supplies a license to create bank credit and a banking 'mirror'. The customers, however, must supply their real assets as collateral, including their future income, with the banks using their customer's assets to create both the reflected 'bank capital' and the funds for the loan. This system of loan creation, using assets and mirrors, now produces a financial decision with astonishing historical POWER! The bank's loans could be recorded as assets to the customers, with a \$1 loan at 0% annual compound interest, calculated daily, over 550 years, creating a customer debt of only \$1. However, the banks consider their loans to be assets owned by the banks, with a \$1 loan at 6% annual compound interest, calculated daily, over 550 years, creating a customer debt of 214 TRILLION DOLLARS! Astonishingly, the banks are 'stealing the world with a dollar created from nothing'! This debt forces the bank's customers to toil for 15 out of every 20 years of their working lives, simply to service the four financial demons, those of debt, interest, taxation and inflation. The banks will not even tell their customers about the ancient laws against usury, the laws which forbade the accrued interest from exceeding the original loan capital. These ancient laws would reduce the customer's debt, from 214 trillion dollars, to \$2!

This imposition of the '214 trillion dollar debt' reduces the customer's life to 'a trail of tears', with the international debt markets now fulfilling the historical roles, once performed by the slave markets from history. The iron chains of the slave have simply been replaced by the financialised chains of debt! This is why the people within our nation can work each day, including selling the products of their labours and the national treasures, yet by nightfall, the nation is even deeper in debt! This is why usury has been cursed throughout history, this is why a monetary supply, appearing as debts bearing compound interest, is one of the definitions for Satanism. This is why the politicians, who defend and promote this banking system, who say, 'these are the laws for money and there is no other way', are politicians who commit treason upon the heart of the nation. Those who operate this debt based monetary system can only be described as psychopaths, possessing a malevolence which seeks to impose the debt bankers' boot upon the human face, forever!

When is humanity going to awaken from these dark dreams of debt finance? How much longer will humanity be deceived by a reflection within a 'banking mirror'? When are we going to realise that our banking system is a criminal enterprise, with roots of betrayal which have ensnared the human heart for centuries? When will we realise that there is no 'pre-existing' bank capital behind our loans, when will we realise that there is no need for compound interest and the dark illusions, created by the debt markets? When will we realise that there is no need for our world to be reduced to a debtors' prison? There is no need for our grinding existences, as debt slaves!

Our nation desperately needs a transparent debate upon the fundamental monetary questions! Why do we create our monetary supply in a psychopathic way, when the heart of our nation depends upon an empathic connection between the people? Should we create our nation's monetary supply as an asset, or as a debt? Should our historical banking loans be erased as crimes against the laws for fraud, fiduciary duty, odious debt, racketeering, pyramid schemes, duress, cartels and contracts? Should we re-engineer our historical loans so that they are now recorded as assets to the customers, with all interest payments, plus cartel penalties, returned to the customers?

Why does humanity find it easier to contemplate nuclear annihilation, and environmental collapse, rather than a change within our medieval monetary system, even though we now have quantum computers and millions of mathematicians and engineers? Have we become so insane that we will reduce our world into ruins, while protecting usury and a monetary supply created from nothing, possessing no intrinsic measure and consumed by compound interest? Are we to be destroyed by our own financial derangement?

The Director of the Bank of England, Sir Josiah Stamp, AD1927.

'The modern banking system manufactures money out of nothing. The process is perhaps the most astonishing piece of sleight of hand that was ever invented... Bankers own the earth. Take it away from them but leave them the power to create money, and, with a stroke of a pen, they will create enough money to buy it back again...but if you want to continue to be the slaves of the bankers and pay the cost of your own slavery, then let bankers continue to create money and control credit'.

Robert H. Hemphill, Federal Reserve Bank of Atlanta.

'If all the bank loans were paid up, no one would have a bank deposit, and there would not be a dollar of currency or coin in circulation. This is a staggering thought. We are completely dependent on the commercial banks for our money. Someone has to borrow every dollar we have in circulation, cash or credit. If the banks create ample synthetic money, we are prosperous; if not, we starve. We are absolutely without a permanent money system. When one gets a complete grasp upon the picture, the tragic absurdity of our hopeless position is almost incredible – but there it is. It is the most important subject intelligent persons can investigate and reflect upon. It is so important that our present civilization may collapse unless it is widely understood and the defects remedied very soon'.

James Madison, fourth president of the United States.

'History records that the Money Changers have used every form of abuse, intrigue, deceit and violent means possible to maintain their control over governments by controlling money and its issuance'.

John Acton (1834-1902).

'The issue which has swept down the centuries, and which will have to be fought sooner or later, is the people versus the banks'.

Mackenzie King, Canadian Prime Minister 1935-1948.

'Once a nation parts with the control of its currency and credit, it matters not who makes the nation's laws. ... Until the control of the issue of currency and credit is restored to government and recognized as its most sacred responsibility, all talk of the sovereignty of parliament and of democracy is idle and futile'.

The Bank of England Quarterly Bulletin, 2014.

'Whenever a bank makes a loan, it simultaneously creates a matching deposit in the borrower's bank account, thereby creating new money'.

Ralph M. Hawtry, former Secretary
of the Treasury.

'Banks lend by creating credit. They create the means of payment out of nothing'.

Professor Irving Fisher, Yale University,
in his book '100% Money'.

'If two parties, instead of being a bank and an individual, were an individual and an individual, they could not inflate the circulating medium by a loan transaction, for the simple reason that the lender could not lend what he didn't have, as banks can do. Only commercial banks and trust companies can lend money that they manufacture by lending it'.

US President John Adams.

'There are two ways to conquer and enslave a nation. One is by the sword. The other is by debt'.

Henry Ford

'It is well enough that people of the nation do not understand our banking and monetary system, for if they did, I believe there would be a revolution before tomorrow morning'.
