

The Debt Monster!

Our bankers and politicians terrorise us with the mythical 'debt-monster'! However, have you ever asked the questions, 'Who supplies the capital for our loans, when the world is drowning in debt'? 'What is money'? 'What is the measure for money'? 'Who shall create the monetary supply'? 'Who shall derive the benefits from the streams of interest'? 'Shall we create our monetary supply as an asset or as a debt'? 'Are our banknotes simply debts, created from nothing'?

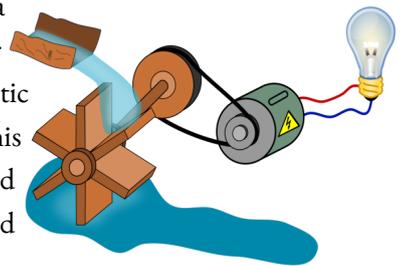

Banks do not loan bank capital, banks loan bank credit, created by monetising their customer's collateral in a banking mirror, a system called double-entry bookkeeping. If the customer has no collateral, then the bank has no capital! A \$1 loan at 6% annual compound interest, calculated daily, over 550 years, creates a debt of 214 trillion dollars, even though the ancient laws against usury forbade the interest from exceeding the original loan capital. These laws would reduce our debt from 214 trillion dollars, to \$2! Do you know that our loans, owned by the banks,

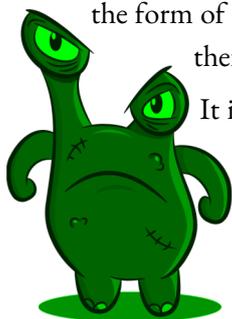

could be re-engineered and created as interest-free assets, owned by the customers, with all capital and interest returned to the customers? Do you know that the banks violate the laws for fraud, fiduciary duty, racketeering, cartels, odious debt, duress, pyramid schemes, and contracts, when the banks claim that they loan pre-existing capital, a claim which forces their customers to pay compound interest. All customer loans then could be deemed void, with the bank forced to pay cartel penalties to their customers, penalties which are three times the projected profit from the loans!

Have you ever wondered, 'if the banks simply convert our nation's treasures into debts, bearing compound interest, then why doesn't our nation convert the national treasures into financial assets, owned by the nation'? In the Australian example, twenty million people, times \$25 an hour, times 40 hours per week, times 50 weeks per year, creates an asset lake of one trillion dollars, a lake which could power our nation interest-free! In this system, money is simply defined as 'human life-force traded within a marketplace'. The measure for money, similar to the electrical measure of the Watt, becomes 'the distance that a typical human being, walking at the normal speed of 5km/hr, will cover within one hour, that is 5000 metres'. This monetary unit is a measure of human physiology, human psyche, time, distance and the speed of light, as a metre is a measure of the speed of light within a vacuum. This is a monetary measure which has echoed throughout the historical human journey, it is a measure which is intrinsically familiar to the human psyche!

The other two million species upon our planet already use this asset monetary system, a system resembling a hydro lake, with the 'waters' of life-force creating the energy to power our planet. This asset monetary system satisfies Aristotle's five definitions for authentic money, to be portable, durable, divisible, easily recognisable and intrinsically valuable. This asset system fulfills the economists' dream for a monetary system which is 100% reserve and operates using the minimal technological costs, those of debt, interest, taxation, and inflation! This asset system monetises the 'commons', the great beating heart of our nation!

How much longer then will we tolerate a monetary supply created as debt-confetti, with no intrinsic measure, created by hidden bankers, who pull their banknotes from cavities where the 'sun don't shine', and then force the people to sell the treasures of their nation to pay the bankers' debts! Astonishingly, the bankers are charging us 75% of all we earn, each day, in the form of the four financial demons, those of debt, interest, taxation, and inflation, simply for the privilege of using their debt-confetti. The 'goose' of humanity has well and truly been plucked!

It is time then for us to examine this debt-monster, this 'rabies virus' of bankers' debt. We need discussions within our internet forums, our coffee shops, our national media, and our political institutions. We need to awaken from our prisons of debt peonage, we need to investigate the slave-plantations which we call 'life'. We need to return the creation of our monetary supply to the nation, to the realm of 'The Light, the Asset and the Sacred'! We need to awaken so that our lives, and the lives of the generations yet to be born, will no longer have the 'debt-bankers boot upon the human face, forever'!

Historical Banking Quotes

Robert Anderson, Treasury Secretary under Eisenhower

'When a bank makes a loan, it simply adds to the borrower's deposit account in the bank by the amount of the loan. The money is not taken from anyone else's deposits; it was not previously paid in to the bank by anyone. It's new money, created by the bank for the use of the borrower'.

The Director of the Bank of England,
Sir Josiah Stamp, 1927.

'The modern banking system manufactures money out of nothing. The process is perhaps the most astonishing piece of sleight of hand that was ever invented... Bankers own the earth. Take it away from them but leave them the power to create money, and, with a stroke of a pen, they will create enough money to buy it back again...but if you want to continue to be the slaves of the bankers and pay the cost of your own slavery, then let bankers continue to create money and control credit'.

Professor Irving Fisher, Yale University,
in his book '100% Money'.

'If two parties, instead of being a bank and an individual, were an individual and an individual, they could not inflate the circulating medium by a loan transaction, for the simple reason that the lender could not lend what he didn't have, as banks can do. Only commercial banks and trust companies can lend money that they manufacture by lending it'.

The Bank of England Quarterly Bulletin, 2014.

'Whenever a bank makes a loan, it simultaneously creates a matching deposit in the borrower's bank account, thereby creating new money'.

James Madison,
fourth president of the United States.

'History records that the Money Changers have used every form of abuse, intrigue, deceit and violent means possible to maintain their control over governments by controlling money and its issuance'.

Mackenzie King,
Canadian Prime Minister 1935-1948.

'Once a nation parts with the control of its currency and credit, it matters not who makes the nation's laws. ... Until the control of the issue of currency and credit is restored to government and recognized as its most sacred responsibility, all talk of the sovereignty of parliament and of democracy is idle and futile'.

US President John Adams.

'There are two ways to conquer and enslave a nation. One is by the sword. The other is by debt'.

Henry Ford

'It is well enough that people of the nation do not understand our banking and monetary system, for if they did, I believe there would be a revolution before tomorrow morning'.

Ralph Hawtry, former Secretary of the Treasury.

'Banks lend by creating credit. They create the means of payment out of nothing'.

The creation of the monetary supply as debts bearing compound interest fulfills one of the definitions for Satanism!

We need to investigate then our nation's monetary supply, we need to awaken from the financial curse of usury, the plague which has destroyed civilisations and the heart of humanity!
