

The Dark Spells of Debt!

Sir Josiah Stamp, The Director of the Bank of England, AD1927.

'The modern banking system manufactures money out of nothing. The process is perhaps the most astonishing piece of sleight of hand that was ever invented... but if you want to continue to be the slaves of the bankers and pay the cost of your own slavery, then let bankers continue to create money and control credit.'

Money is a technology we use for trading goods and services, through time. Surprisingly, we haven't changed this technology since the Middle Ages, a time when slavery was a plague upon the earth. This suggests that our concepts for money will be badly flawed, and yet we never seem to ask, 'who supplies the capital for our loans, when the world is drowning in debt?', or ask, 'who owns our debts?' Perhaps the debt-owners are deliberately hidden, masked, to avoid the people's rage?

The first flaw in our monetary system. The greatest treasure in our nation, the ownership of the monetary supply, has been secretly privatised, so we now lease our nation's money as banking debts, bearing compound interest, fulfilling one of the definitions for Satanism! Our financial treasure, the honey in the human hive, is now owned by the 'parasite wasps', the debt bankers, reducing our world to plantation slavery and debt peonage. We are now utterly dependent upon credit ratings and interest rates, with our world sacrificed to the exponential tyranny of compounding interest, until the bankers will eventually announce, perhaps within a Satanic ritual, that 'the world is Ours'!

The second flaw. We have discarded one of the core laws from history, the laws which forbade the accrued interest from exceeding the original loan capital. The bankers now have no limits to the usury which they can impose upon our nation!

The third flaw. Banks create capital by placing customer collateral before a financial mirror, called double-entry bookkeeping. The banks record the reflection in the mirror as bank capital, owned by the bank, with the mirror acting as a photographic negative, designed to reverse the financial polarity of our world, turning assets into debts, light into darkness, and abundance into hunger! Our banks then are little more than pawn shops with a license to create bank credit.

A bank customer signs a \$1 loan, at 6% annual compound interest, calculated daily, before the customer goes home to test his new sleeping potion. He wakes up 550 years later to discover that he now owes the bank 214 trillion dollars, a debt imposed upon a reflection of his own \$1 in collateral! Do you still believe that these are the 'laws for money and there is no other way', even when faced with these financial truths, revealing a system of deception, greed, usury, and the seeds for war?

Here then are four 'Shakespearean' solutions to our financial predicament. Firstly, we can impose the ancient laws which forbade interest from exceeding loan capital, reducing the 214 trillion debt to \$2. Secondly, our monetary system is a swindle and our loans can be erased, with three-times cartel penalties imposed upon the banks. Our sleepy bank customer now has 642 trillion dollars deposited into his account! Thirdly, it is the customer's own collateral which creates the reflection, called bank capital, in the financial mirror. It is moral then for all historical customer debt to be converted into interest-free loans, with all previous banking costs and interest payments returned to the customers. Fourthly, we can simply void all debts in a historical Jubilee and create a nationally owned asset-based monetary system! We will then have destroyed the dark myths which surround the 'price of capital' and we will have joined the other two million species upon our planet, those who run their complex communities free from the four financial demons, those of debt, interest, taxation, and inflation! Perhaps then only three kinds of people create their monetary supply as debt. They are the ignorant, the insane, and the psychopathic!
