

Three Flaws in our Banking System!

Sir Josiah Stamp, The Director of the Bank of England, AD1927.

'The modern banking system manufactures money out of nothing. The process is perhaps the most astonishing piece of sleight of hand that was ever invented... but if you want to continue to be the slaves of the bankers and pay the cost of your own slavery, then let bankers continue to create money and control credit.'

The first flaw. Our banking system has been secretly privatised, our monetary supply has become debt, with the streams of interest seized by the debt bankers, trapping us within one of the most hated historical crimes, that of Usury! When our monetary supply is created bearing 3% annual compound interest, then 40% of the retail prices will be owed to the debt bankers, and 75% of the people's income will be lost to the four financial demons, those of debt, interest, taxation, and inflation. Inevitably, within a Satanic ritual, the debt bankers will announce, 'We own the World'!

The second flaw. Interest is allowed to exceed loan capital. As an example, a customer signs for a \$1 bank loan at 6% annual compound interest, calculated daily, before he goes home to test his new sleeping potion. He awakes, 550 years later, to discover that he now owes the bank 214 trillion dollars! The imposition of compound interest, upon one individual for centuries, or an entire nation for a single day, has the same effect, the creation of the slave plantations of debt!

The third flaw. Banks create the capital they loan by monetising customer collateral. The banks simply place their customer's assets before a financial mirror, called double-entry bookkeeping, and record the reflection as 'bank capital', owned by the bank. The mirror acts as a photographic 'negative', reversing the financial polarity of our world, turning assets into debts, light into darkness, and abundance into hunger, with our banks becoming little more than pawn shops, possessing a license to create bank credit. Astonishingly, the bank customer is paying 214 trillion dollars upon a reflection of his own \$1 in assets!

This banking system is so absurd that it must have been designed for 'Shakespearean idiots', designed for the ignorant, the insane, and the psychopathic! How can we believe that this financial system, based upon deception, greed, usury, and the seeds for war, fulfils the 'Laws for money and there is no other way'? This system is a crime so audacious that even parasite wasps would hesitate before imposing its chains upon the innocent trust of humanity! However, these three financial flaws explain how our nation can labour each day, and sell the production of the people and the resources of our planet, and yet by nightfall, our nation is even deeper in debt. The flaws answer the perplexing question, 'who supplies the capital for our loans, when the world is drowning in debt'? We can now ask, 'who dwells in the Shadows, who owns our debts'? We can wonder, 'how do the other two million species upon our planet run complex communities, without using debt, compound interest, and the Satanic 'price of capital', the dark forces which create the prisons of debt peonage?

Perhaps it is time then for us to investigate this technology which we call 'money', a technology which remains almost unchanged since the Middle Ages. Why don't we impose the ancient laws which forbade accrued interest from exceeding loan capital, reducing the '214 trillion' dollar debt, to \$2! Why don't we convert our loans into interest-free assets, with the return of all interest payments to the banks' customers, for it is the customers own collateral which creates the reflection which the banks call 'capital'? A \$1 loan, bearing 0% annual compound interest, over 550 years, creates a debt of only \$1! We could also void our loans and impose three-times cartel penalties upon the banks! And we could create an asset banking system, owned as a great treasure by our sovereign parliament, protected, forever, within the heart of our nation!

When will we examine our nation's monetary system, for the sake of those yet to be born!
